

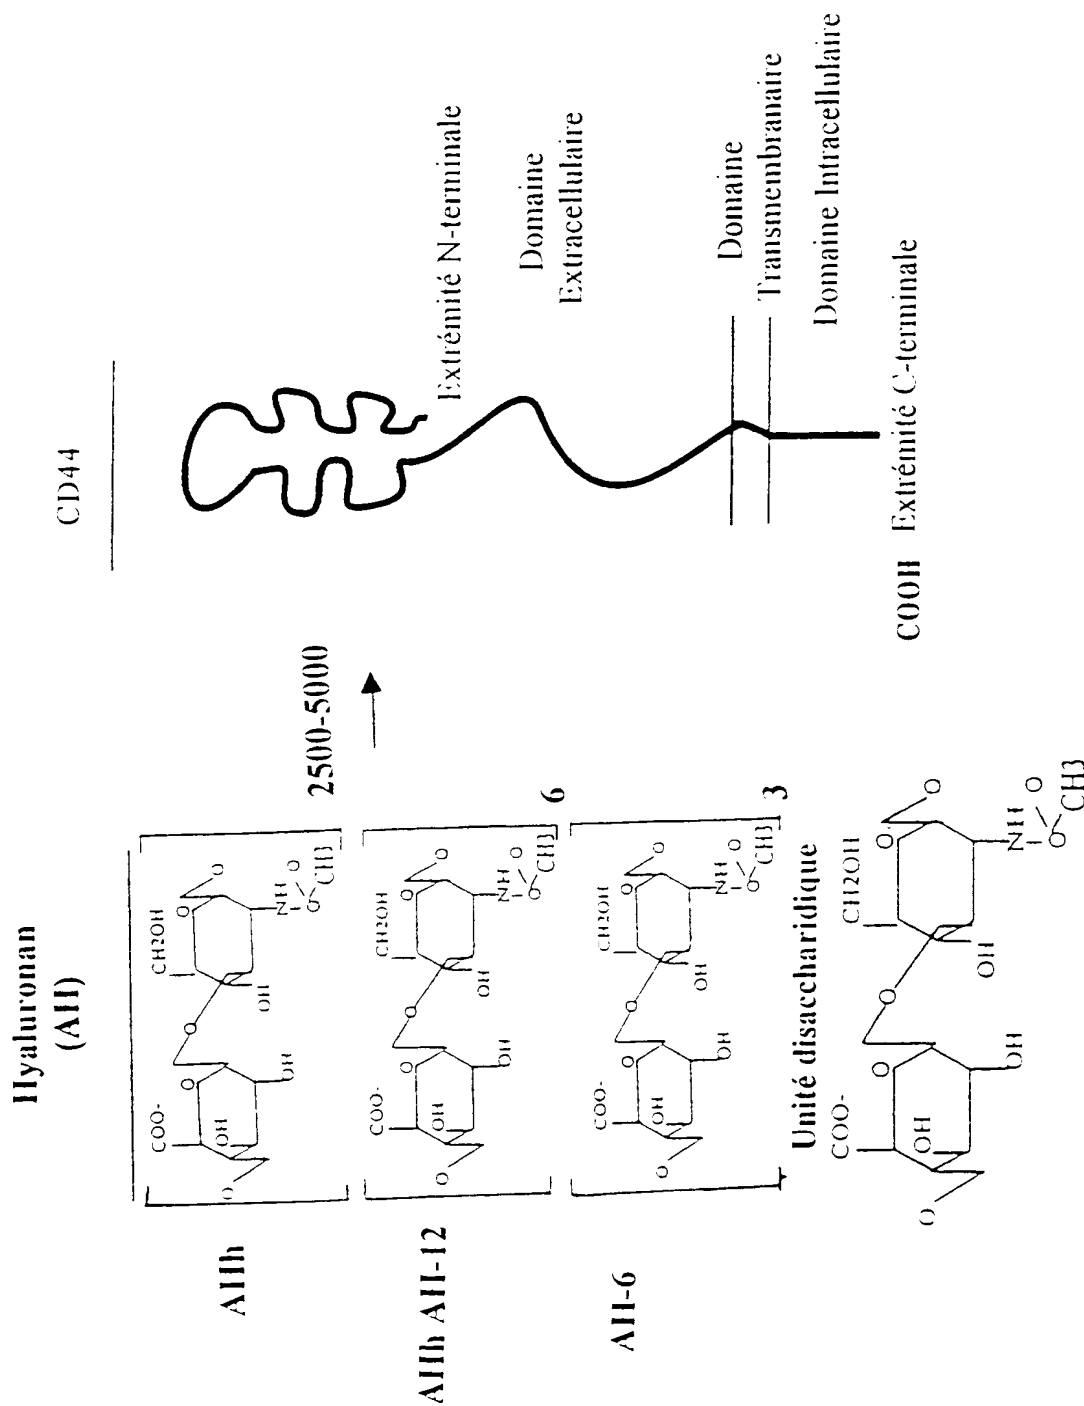

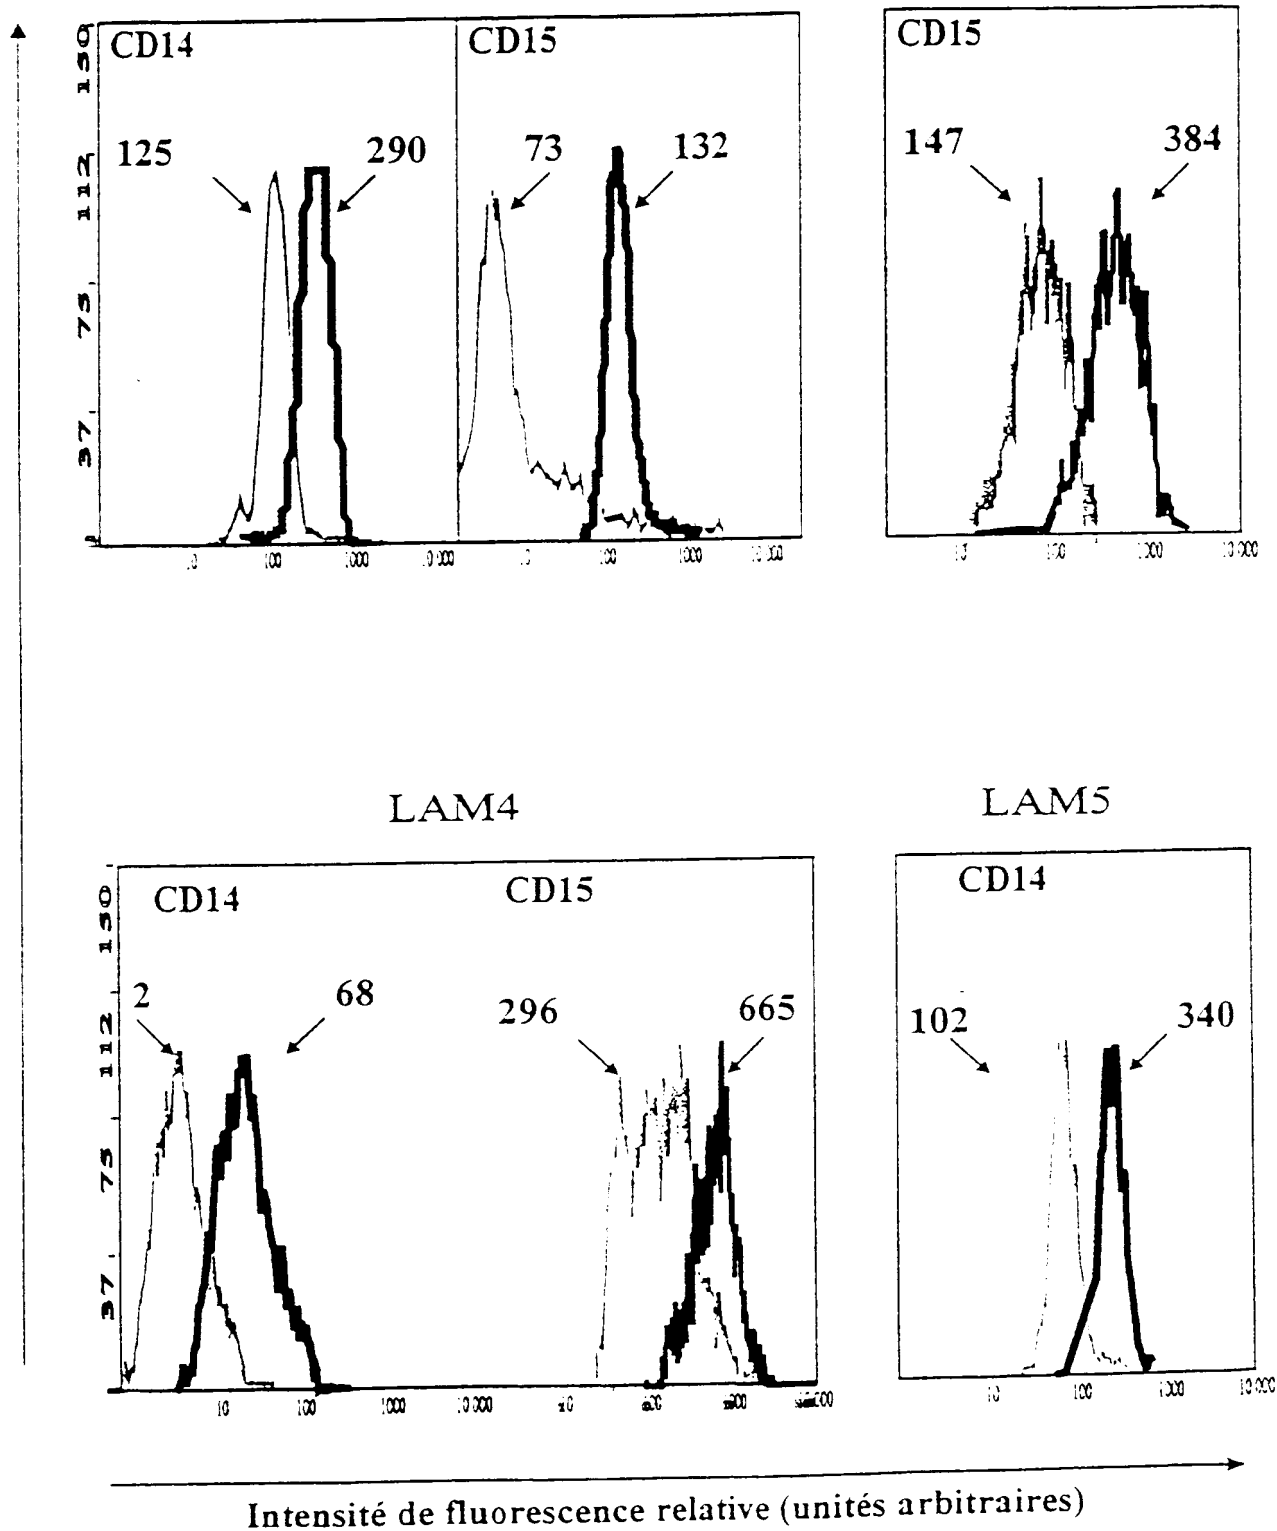

**FIGURE 1B**

LAM1/2 3/8

LAM3

Nombre de cellules

Les nombres indiquent les intensités de fluorescence relatives

— cellules leucémiques traitées par l'AH

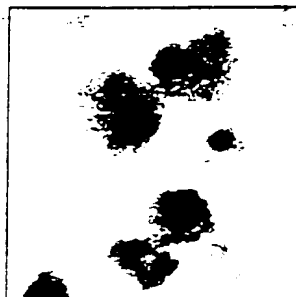

— cellules leucémiques témoins

R)

LAM3: traité par AR

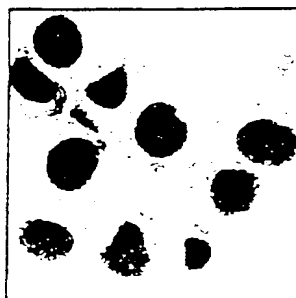

LAM1: cellules NBT+ après traitement au AH

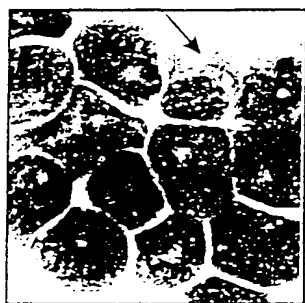

LAM3: traités au AH

LAM5: traités au AH

LAM3: témoins négatifs

LAM5: témoins négatifs

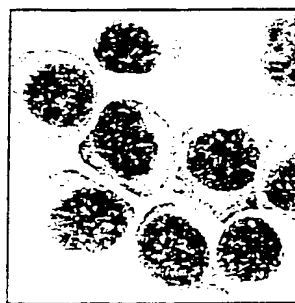

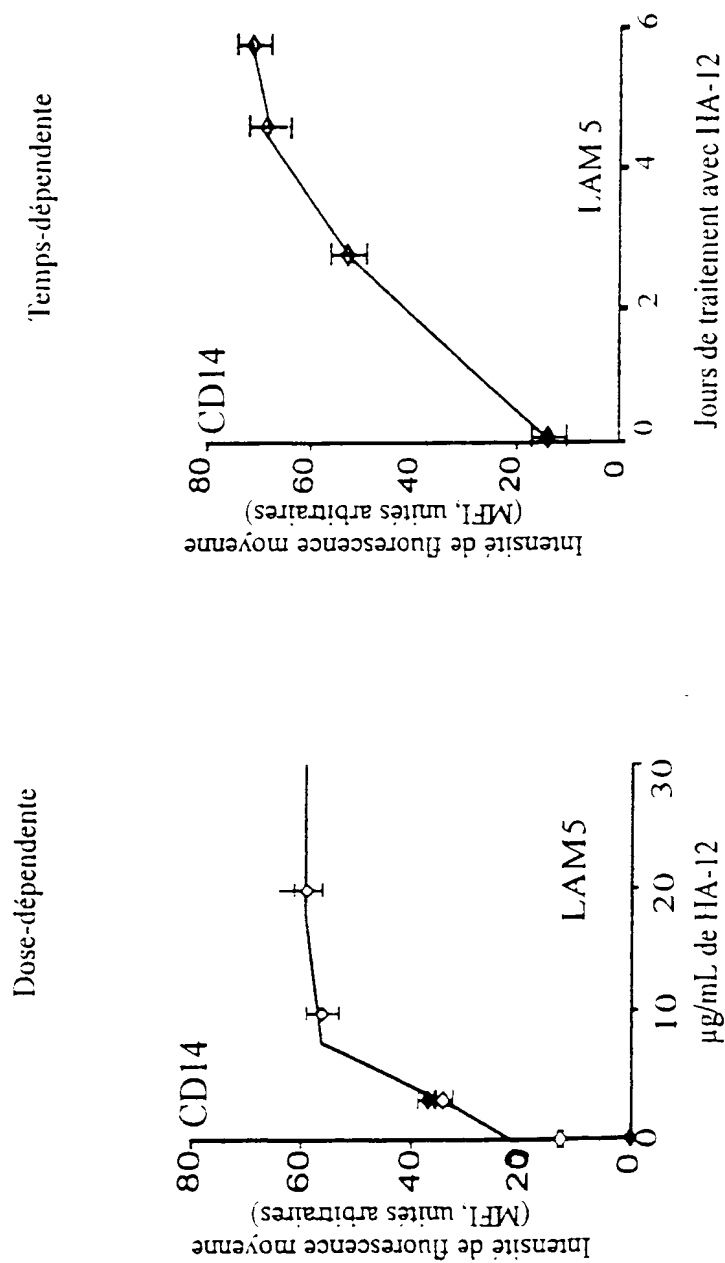

Figure 2B

Figure 3A

La différenciation induite par AII est :
